By Jessica Reed If you're looking for educational and fun games for kids, look no further than the kids's web site pbs. PBS is always adding games to teach children skills, would be reading and counting. The games are family friendly and simple enough for a child to figure out the instructions. Open the PBS kids games website. (There is a link below.) Click on one of the main images in the middle of the screen to play one of today's popular games. Click the circles at the bottom to see lists of games related to PBS programs. Click the left or right arrows on either side of the circles to scroll through all the games. After you click on a circle and find a game you want to play, click on the game image. Wait for the game to load and click Play. Depending on the game you choose, there may be different options. Click different parts of the screen to find different tasks. Listen to the game's instructions and watch the screen to learn how to play the game you've chosen. When you want to quit, press the back button to find a new game to play. Whether you're 40 or 14, you're going to love playing these golden-age games on your PC. Back when the PC operating system was either DOS or MS-DOS, the basis of the games were established. If you're in the older group, why not take your kids, nieces or grandchildren down your memory band with you by introducing them to the following list of the best DOS games. One way or another, they will be amazed, the Oregon Trail Oregon Trail was one of the best DOS games to happen at classrooms at halftime. Believe it or not, it was first created in 1971 in Minnesota. It hit a wider distribution through Minnesota in 1974 and eventually around the world. Selling more than 65 million children and sparking untold computer-related careers, who knew dysentery could be so fun and educational? Sim City Sim City has proven that there is something about people that attracts us to build empires and then smashing them for fun. Test your hand at municipal development and management without the risk of someone hurt. Published in 1989, this city building game was the first installment of a sim-related gaming franchise. There is no doubt that you have played at least one of its DOS-related games. Wolfenstein 3D Wolfenstein 3D is the second DOS game in the Wolfenstein franchise, after Castle Wolfenstein. Classic first-person shooter (FPS) puts you in control of the hero, B.J. Blazkowicz, in a three-dimensional maze. The goal is to defeat the level-level Nazis and chief of chief. Some people credit Wolfenstein 3D with being the first FPS. This distinction is held by Maze Wars and dates back to 1973. Wolfenstein 3D the one to make FPS a household word, at least for gamers. Pac-Man Pac-Man has been synonymous with computer games for more than a decade. She almost exhausted America's supply quarters from banks, gave rise to gambling injuries and a top ten song hit, Pac-Man Fever. As straight-moving dos since the 80s made the leap from arcades to home computers quickly for almost every platform you can think of. It continues to be available today on Xbox and in countless knock-off apps. The DOS version is as close to the arcade experience that you will get these days. Maniac Mansion Maniac Mansion, 1987, introduced Lucasfilm Games' SCUM interface. Yes, Lucasfilm as in Star Wars, and SCUM meaning Script Creation Utility for Maniac Mansion. After the name suggests, Maniac Mansion is a strange game with strange things going on and a crazy scientist, Dr. Fred. Your mission is to infiltrate the mansion with your high school buddy Dave to find Sandy, a girl who disappeared from your school. It sounds weird, but it's weirdly fun and exciting. Prince Of Persia Prince of Persia was a 2D platform adventure on PCs 20 years before Jake Gyllenhaal was cast to play Dastan street hedgehogs. Motivated by his love for the sultan's daughter, our hero must escape from prison, run, jump, and fight his way sword to save her from the evil Great Vizier Jaffar. Prince of Persia was the first DOS game to bring a cinematic feel to the games. Where in the world is Carmen Sandiego? Where the world is Carmen Sandiego was another educational game that leaked into the history of pop culture. Since 1985, children have learned about geography and world history by following the easive thief Carmen from around the world. The game came out of class and on TV with a title song you hear in your head right now, if you've ever heard it before. There are rumors that a movie is in the works too. Championship Manager Championship Manager may seem strange in this list if you are from North America. In the UK, it was the fun of every football nerd when they weren't watching or talking about football. It wasn't even the first fantasy sports team game, but it caught on and the annual versions were published from 1992 to 2011. That's quite a standard-driven one. DOOM DOOM must be on the list. He's on every list. If Wolfenstein 3D opened the FPS door, DOOM marched through it and downloaded BFG 9000 to everyone. Being released as 9-level, shareware free in 1993, the game reached about 20 million players in 2 years. Additional levels were sold by mail order. Innovative multiplayer doom mode allowed you and your friends to work together to pull out Cacodemons, or you could go Deathmatch on each other. May the best marine space live. Street Fighter II Street Fighter II is the iconic head-to-head game backs fighting since the '90s. As children, most of us don't even know that there was a Street Fighter I. Starting from the arcade, raked in quarters and its popularity did not slow down when it moved to in-home games. The battle combo style he introduced was actually a bug. Noritaka Funamizu noticed in the test that making combo hits was possible, very hard to do, but still possible. He felt it was so unlikely that someone would that they'd let him in. Now there is a feature in every fighting game. Arcade is always open These 10 best DOS games may not be personal top ten, but all have been extremely popular and influential on games, game development, and pop culture around the world. Every game you play today owes a debt of gratitude and more than a few lines of code for these trailblazers. With sites like the MS-DOS Internet Archive Library, these stones are preserved for today and in the future. This is my drag racing bike. It's made of an old radius of sting we found. (bought for \$15 for parts) and an old 10 speed member of my family gave me. I was wondering around looking for something to do. I had that old 10 speed on the shelf and the radius goes out in parts of the shelf and I was like putting those together! and then he was born. please rate-comment-subscribe if you have any questions email me at suzukiidrtider@hotmail.comtake speed forks of ten. this includes taking the handle bars. When you have the handles on take out the shifters off and put them away. We'll need them later. Then once you have the handle bars on remove the forks. Remove the large screw with a plumber key or any other large key. once until the screw you take out by hand make sure you take the little safety spacer off because just like the smart one I'm losing an hour trying to pull it out then found that the stupid thing had to come off first. remove the forks and save the bearings, we will need them later. put aside now allows you to move to #2sorry but there is a picture on the Internet I had done this before I started this. But to take the forks off is a matter of removing the screws for the neck piece. Don't lose the handles because we're going to need them for this. Once you get them off lets us back to speed 10putting it together is the first easy step to take the old bearing from the speed of 10 a put them on the left-ray neck. then put your neck on the 10 speed frame. once you put that screw back on your neck put the handle bars back on. then take the shifters I put about 6 inches away from the seat post. then make sure you all tight and have fun riding you new drag bike!here is what I did in. instead of a car battery I used two battery drilling. It's mine. It all works the same and its about 30 pounds lighter with the car's battery. I added a high and low switch for head light, so that is the light switch and below that high and low beam. other images of the light head on one I had flash on (camera) the other was offParticipated in Light Up Your Ride AFP - Agence France Presse May 5, 2020 Reprints Print Article U.S. video games titans Activision and Electronic Arts on Tuesday reported strong gains as people stay home because of the coronavirus pandemic turn to games, such as Call of Duty. Activision said an average of 102 million people played its online games per month in this year's quarter with Call of Duty: Warzone racking up more than 60 million players since its release in March. Our goal of connecting the world through epic entertainment is more important to our players than ever before, Activision Blizzard executive director Bobby Kotick said in a earnings release. In the face of so many difficulties, our employees have ensured that the joy, involvement and benefits of gambling remain an effective way to help keep the 400 million players around the world connected and safe. The game of Overwatch and World of Warcraft continued to climb, and the popular color matching smartphone game Candy Crush held firmly as the top-grossing franchise in U.S. mobile app stores, according to Activision. Activision reported a profit of \$505 million on revenue of \$1.8 billion in the quarter. Electronic Arts reported that its net income doubled to \$418 million on revenue sup to \$1.4 billion in the first three months of this year. The latest installment in the popular FIFA football video game franchise boasted more than 25 million players, and the Madden NFL 20 title -- dedicated to American professional football -- saw the biggest online engagement numbers in the franchise's history. A newly released Star Wars Jedi: Fallen Order has boasted about more than 10 million users. We are humbled to see people from all over the world connecting through our games during this unprecedented period, EA Chief Executive Andrew Wilson said in a news release. Our focus continues to be on everything we can do for our people, our players, and our communities. EA said it continues to see growing engagement with its online services as people remain hunkered down at home because of the pandemic. The California-based company warned, however, that the full effect of the crisis on its business remained hard to predict. People without jobs might have time to play, but they might be more interested in finding jobs or saving money. Working remotely could take a toll on the productivity of the game company. Activision Blizzard shares climbed about four percent in after-market transactions, while EA shares slipped by about four percent. gc/at the Barron news department was not involved in the above content creation.
